

**Subject:** Impending Rules on the use of Decabromodiphenyl Ether (DecaBDE) Flame Retardant:

**References:** a) EPA DecaBDE Phase-out Initiative

The United States Environmental Protection Agency's (EPA's) initiative to phase-out the manufacture, import and use of DecaBDE (CAS number 1163-19-5) in the United States.

DecaBDE has played a necessary role in meeting important flammability and other critical technical requirements in aerospace products, including but not limited to electronics, textiles, wire insulation, composites, adhesives, and interior components.

This inquiry is being sent to suppliers requesting information on the presence of DecaBDE in parts and materials supplied to Quatro Composites, LLC.

In order to prepare for compliance with impending US and international regulations on DecaBDE, please provide a response to the following:

**Do the materials, parts, and assemblies you provide to Quatro Composites, LLC. contain DecaBDE?**

*Please note: your answer should account for the materials and components in your supply chain.*

Please send your response to [Ren.Eide@Quatrocomposites.com](mailto:Ren.Eide@Quatrocomposites.com).

Thank you for your attention to this inquiry.

Regards,

Ren Eide  
Supply Chain Manager
